

4/26/15

R3S1 - site survey + turf/ed  
quads.

Turfs very visible. Sediment  
coarse. Coral recruits  
evident. Channel is  
next on edge at this  
site. Drop off. Beautiful.  
No effect.

R3S2 - 200m line.

Every 10m photos on  
either side. Find  
transition zone and  
document w/ quad.  
Document hard corals  
w/in 1/2 m on either  
side of line.

Vis on dive 50-75ft. turfs  
coming thru everywhere.  
Recruits / corals less  
than 5cm visible.  
10m south of channel

octocoral density increased  
many X 800s  
Strong north current.

(R3S1 200 m line.

Coral recruits, turf algae  
immediately evident.  
Went to 30th - 35m.  
Halimeda.

R3N1 site survey  
lots of turf algae +  
Dictyota, brown, green.  
Saw no coral recruits  
here. Halimeda.

R3N1 - site survey  
Still white on bottom.

Very little turf coming  
through. No ~~Halimeda~~  
zone. ~~Dictyota~~ some  
crane on bottom.  
No coral recruits
