

4/27/15

R3N2-500-

turf/sed. turf coming thru
few corals, pockets of
material, but otherwise
sand is mixed w/ water
cal from dredge.

Took 5 quads & land-
scape photos.

Sediment: Sandy, not
silty. In low areas pockets.

10:48:15 4/27/15 - Hypack

North edge of anchorage.
No impact line - turfs
apparent.

R3N2-250 - no sediment pockets

w/ dredge material. Sed.

depth greater than 500.

Sed. felt silt like

Turfs coming thru, ^{less} ~~more~~

small sponges! Seemed
unpacked thru 500 m.

R3N2-150 1:23pm

turf/sed. First location
where Mearns had
signs consistent w/ sed
stress. Sand was
coarse w/ few pockets
of silty sediment.

Turfs coming thru sed.
across reef. Lower
relief than previous
sites.

R3N2-50

In low reef areas partial
mortality consistent
w/ sediment burial.

Found pockets of claylike
material.

Stall
